**Subject:** Conclusions re Plan Bay Area

After observing the entire June 14th meeting, including the Telephone Poll, it becomes clear that 1) a significant majority of residents prefer Local Cities and Counties to do their planning, rather than your regional plan.

2) the purported purpose of the Bay Area Plan was to reduce GHG emissions, and this (per CA Air Resources Board) IS being accomplished in a timely manner by transportation technologies such as more fuel-efficient cars, electric cars, and telecommuting.

3) Because, since most taxpayer citizens do not know fully - if anything - what the One Bay Area plan is about, this plan MUST be voted on since it significantly affects the citizen's lives and wallets.

This plan MUST BE PUT TO A VOTE OF THE PEOPLE !

Thank you.
